

Corporate policy

WALDNER Group

The terms quality, PEFC, energy, information security, sustainability, environmental protection and occupational health and safety are particularly important to the entire WALDNER Group. They represent one of the foundations of our successful business operations and are a key criterion for customers at home in Germany and abroad when buying our products and systems.

The publication of this corporate policy underlines the determination of the management and all of our members of staff to act responsibly and with proper regard to quality, PEFC, energy, information security, sustainability, environmental protection and occupational health and safety. Our decisions are based on the aim of fulfilling the demands placed on us. Furthermore, we are committed to ensuring all our business activities comply with applicable laws and all other relevant requirements as well as to reducing or avoiding any impacts, dangers or risks relating to the environment, occupational health and safety or information security.

We wish to emphasise that we support and encourage consultation with our staff and their participation as well as the provision of information and resources. The corporate targets we set annually serve to continuously improve the company's performance in relation to quality, PEFC, energy, information security, environmental protection and occupational health and safety.

In order to improve energy efficiency holistically and sustainably, energy management from the purchase of products and services, through the design of systems, to sales and service is established as a fixed strategic instrument across all processes.

Our work is based on globally accepted standards. Our processes and procedures are inspected and certified annually by an independent certification body to ensure that we meet international standards.

This corporate policy serves as a binding guideline for all staff of the WALDNER Corporate Group to ensure they conduct themselves in a safe, considered, customer-focussed and responsible manner.
